

Agenda Item: Discuss Update on RESTORE Award for East End Lagoon Phase 1A

Background: Development of the open-air interpretive center at the East End Lagoon is reliant on the disbursement of funds from the RESTORE federal grant, created in 2012 after the 2010 BP oil spill. Funding of \$1.35m was accepted in 2017 to develop the center as lined out in Phase 1A of the 2010 AECOM plan (since updated in the 2019 East End Lagoon Business Plan as Phase 2 development). The hope is that funds will be disbursed by 2022. Currently, Sheryl Rozier, Park Board Project Manager, is working with the Texas Commission on Environmental Quality on the contract.
