

Agenda Item: Discuss and Consider The Purchase Of A Used Dump Truck With 12-yard Compacity From Max Trucks & Equipment

Background: Currently Beach Cleaning does not have a dump truck; when we must repair access points with materials, we depend on the availability of the city or rent a truck. A Park Board owned truck will allow staff to make post-storm or high-tide event repairs faster while saving money on rental fees. The truck will also allow staff to purchase materials at a lower cost from suppliers such as Southern Concrete because the materials will no longer have to be delivered, saving on delivery fees. The truck will be used to maintain and repair access points and beach parking lots that are the Park Board's responsibility.

Staff obtained three quotes. The truck that's purchased may be different to the one quoted, due to the unit being sold to another customer. However, the truck purchased will be within the same quoted price range. The truck will be inspected by the Head Mechanic, Operations Manager and Lead Operator. Staff recommends the purchase of a used truck because the cost of a new truck is roughly \$190,000 and a used truck serves the same purpose

Staff Recommendation: Staff recommends approval to purchase a used dump from Max Trucks & Equipment at the cost of \$49,990.00. Staff recommends approval for the middle quote because the truck has an automatic transmission whereas the low quote has a manual transmission.

Funding Source (if applicable): BC70-5252-Equipment Purchase (used dump truck budgeted at \$60,000)
