

Agenda Item: Discuss Programming for World Oceans Day 2022

Background: World Oceans Day is an international day of celebration to commemorate the role of the oceans in our lives and an opportunity to inspire stewardship of the marine environment. As always, World Oceans Day will be celebrated on June 8th. The festival has been moved from Stewart Beach to East Beach this year in order to encourage the use and designation of East Beach as an eco-park.

At the February 2020 BMAC meeting, the below suggestions were put forth for booth ideas for the committee to host.

- A photobooth opportunity with "under the sea" themed props
- A stewardship pledge for kids to pledge to care for our coastlines and to teach them the meaning of stewardship
- A craft opportunity – coloring maps of Galveston
- Educational pamphlets on how the Park Board is a steward of the environment

Staff Recommendation: Staff is seeking guidance from the Committee on booths and activities they would like to see for World Ocean's Day 2022
