

**Agenda Item:** Presentation, Discussion And Consider Approval To Purchases Of Mobile Shade Structures

**Background:** In the FY 21/22 Park Board budget there is a significant project to install mobile amenities at Stewart Beach Park. Mobile amenities include items such as restrooms, lockers, concessions and showers. The successful launch of mobile amenities will allow the Park Board to eventually remove all operations from the current pavilion that has reached its end of useful life.

The mobile amenities will be designed for rapid removal in case of inclement weather. For the deployment of mobile amenities there will need to be extension of water and electric to the mobile units. Wastewater will be removed via pumper truck.

Staff presented the Mobile Amenities Concept Plan to PAC on November 4, 2021. PAC is supportive of the Mobile Amenities Plan with the caveat that the mobile units have aluminum frames and all metals used to build the units have protective coatings to prolong the useful life and recommend that the Park Board purchase three mobile shade structures, not just two. This was for other deployment opportunities as well capitalizing on the shipping cost.

Staff received three quotes for similar portable shade structures. RUSH-Co was the lowest priced system, there price includes a spare cover.

FOC Recommended approval.

**Staff Recommendation:** Staff recommends approval to purchase three portable shade structures from RUSH-Co in the amount of \$23,450.

**Funding Source (if applicable):** Stewart Beach Fund as outlined in the approved budget SB-5250-Capital Investments.
